1 [Fast detection of communication patterns in distributed executions](#)

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on CASCON '97**

Publisher: IBM Press

Full text available: pdf(4.21 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on pro often used to obtain a better understanding of the execution of the application. The visualization event tracer developed at the University of Waterloo. However, these diagrams are often very c the user with the desired overview of the application. In our experience, such tools display repe trivial commun ...

2 [Facial modeling and animation](#)

Jörg Haber, Demetri Terzopoulos

August 2004 **ACM SIGGRAPH 2004 Course Notes SIGGRAPH '04**

Publisher: ACM Press

Full text available: pdf(18.15 MB)

Additional Information: [full citation](#), [abstract](#)

In this course we present an overview of the concepts and current techniques in facial modeling introduce this research area by its history and applications. As a necessary prerequisite for facia acquisition is discussed in detail. We describe basic concepts of facial animation and present diff parametric models, performance-, physics-, and learning-based methods. State-of-the-art techn based facial animation, mass-s ...

3 [Exploiting perception in high-fidelity virtual environments: Exploiting perception in high-fide](#)

Additional presentations from the 24th course are available on the citation page

Mashhuda Glencross, Alan G. Chalmers, Ming C. Lin, Miguel A. Otaduy, Diego Gutierrez

July 2006 **ACM SIGGRAPH 2006 Courses SIGGRAPH '06**

Publisher: ACM Press

Full text available: pdf(5.07 MB) mov(68:6 MIN)

Additional Information: [full citation](#), [abstract](#), [references](#)

The objective of this course is to provide an introduction to the issues that must be considered w 3D engaging shared virtual environments. The principles of human perception guide important d and techniques in collaboration, graphical, auditory, and haptic rendering. We aim to show how exploited to achieve realism in high fidelity environments within the constraints of available finit resources. In this course w ...

Keywords: collaborative environments, haptics, high-fidelity rendering, human-computer intera networked applications, perception, virtual reality

4 GPGPU: general purpose computation on graphics hardware

 David Luebke, Mark Harris, Jens Krüger, Tim Purcell, Naga Govindaraju, Ian Buck, Cliff Woolley, Az
August 2004 **ACM SIGGRAPH 2004 Course Notes SIGGRAPH '04**

Publisher: ACM Press

Full text available:  pdf(63.03 MB)

Additional Information: [full citation](#), [abstract](#), [citations](#)

The graphics processor (GPU) on today's commodity video cards has evolved into an extremely processor. The latest graphics architectures provide tremendous memory bandwidth and compu fully programmable vertex and pixel processing units that support vector operations up to full IE precision. High level languages have emerged for graphics hardware, making this computational Architecturally, GPUs are highly parallel s ...

5 A taxonomy of Data Grids for distributed data sharing, management, and processing

 Srikumar Venugopal, Rajkumar Buyya, Kotagiri Ramamohanarao
June 2006 **ACM Computing Surveys (CSUR)**, Volume 38 Issue 1

Publisher: ACM Press

Full text available:  pdf(1.70 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Data Grids have been adopted as the next generation platform by many scientific communities t transport, process, and manage large data collections distributed worldwide. They combine high technologies with high-performance networking and wide-area storage management techniques the key concepts behind Data Grids and compare them with other data sharing and distribution delivery networks, peer-to-peer n ...

Keywords: Grid computing, data-intensive applications, replica management, virtual organizati

6 Survey and taxonomy of packet classification techniques

 David E. Taylor
September 2005 **ACM Computing Surveys (CSUR)**, Volume 37 Issue 3

Publisher: ACM Press

Full text available:  pdf(1.60 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Packet classification is an enabling function for a variety of Internet applications including quality monitoring, and multimedia communications. In order to classify a packet as belonging to a part network nodes must perform a search over a set of filters using multiple fields of the packet as t there have been two major threads of research addressing packet classification, algorithmic and pioneerin ...

Keywords: Packet classification, flow identification

7 Notable computer networks

 John S. Quarterman, Josiah C. Hoskins
October 1986 **Communications of the ACM**, Volume 29 Issue 10

Publisher: ACM Press

Full text available:  pdf(4.66 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [inc](#)

Computer networks are becoming more numerous and more diverse. Collectively, they constitut metanetwork.

8 Identification and classification: Class-of-service mapping for QoS: a statistical signature-b traffic classification

 Matthew Roughan, Subhabrata Sen, Oliver Spatscheck, Nick Duffield
October 2004 **Proceedings of the 4th ACM SIGCOMM conference on Internet measurement**

Publisher: ACM Press

Full text available:  pdf(707.69 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [inc](#)

The ability to provide different Quality of Service (QoS) guarantees to traffic from different applications is a feature for many IP network operators, particularly for enterprise networks. Although various methods for providing QoS in the network, QoS is yet to be widely deployed. We believe that a key factor for adoption is the absence of suitable methodologies/processes for appropriately mapping the traffic of different applications to different ...

Keywords: class of service (CoS), quality of service (QoS), statistical signature, traffic classification

9 Charles W. Bachman interview: September 25-26, 2004; Tucson, Arizona

Thomas Haigh

January 2006 **ACM Oral History interviews**

Publisher: ACM Press

Full text available: [pdf\(761.66 KB\)](#)

Additional Information: [full citation](#), [abstract](#)

Charles W. Bachman reviews his career. Born during 1924 in Kansas, Bachman attended high school in Michigan before joining the Army Anti Aircraft Artillery Corp, with which he spent two years in the Theater, during World War II. After his discharge from the military, Bachman earned a B.Sc. in 1948, followed immediately by an M.Sc. in the same discipline, from the University of Pennsylvania. He then went to work for DuPont ...

10 Balancing performance and flexibility with hardware support for network architectures

Ilija Hadžić, Jonathan M. Smith

November 2003 **ACM Transactions on Computer Systems (TOCS)**, Volume 21 Issue 4

Publisher: ACM Press

Full text available: [pdf\(719.03 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

The goals of performance and flexibility are often at odds in the design of network systems. The challenge is to find enough to justify an architectural solution, rather than a set of context-specific solutions. The Princeton Processing Pipeline (P4) design uses programmable hardware to selectively accelerate protocol processing. A set of field-programmable gate arrays (FPGAs) and an associated library of network processing modules. The hardware is augmented with software ...

Keywords: FPGA, P4, computer networking, flexibility, hardware, performance, programmable hardware, programmable networks, protocol processing

11 Stateful distributed interposition

John Reumann, Kang G. Shin

February 2004 **ACM Transactions on Computer Systems (TOCS)**, Volume 22 Issue 1

Publisher: ACM Press

Full text available: [pdf\(833.84 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Interposition-based system enhancements for multitiered servers are difficult to build because they are typically lost at application and machine boundaries. For example, resource quotas and user identities are lost easily between cooperating services that execute on different hosts or that communicate with each other. Application-transparent system enhancement is difficult to achieve when such context is lost. ...

Keywords: Distributed computing, component services, distributed context, multitiered services, server consolidation

12 The state of the art in distributed query processing

Donald Kossmann

December 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 4

Publisher: ACM Press

Full text available: [pdf\(455.39 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Distributed data processing is becoming a reality. Businesses want to do it for many reasons, and ...

order to stay competitive. While much of the infrastructure for distributed data processing is already network technology), a number of issues make distributed data processing still a complex under systems can become very large, involving thousands of heterogeneous sites including PCs and n machines; (2) the stat ...

Keywords: caching, client-server databases, database application systems, dissemination-base economic models for query processing, middleware, multitier architectures, query execution, query replication, wrappers

13 Security: The shunt: an FPGA-based accelerator for network intrusion prevention

Nicholas Weaver, Vern Paxson, Jose M. Gonzalez

February 2007 **Proceedings of the 2007 ACM/SIGDA 15th international symposium on Field arrays FPGA '07**

Publisher: ACM Press

Full text available: [pdf\(240.27 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

The sophistication and complexity of analysis performed by today's network intrusion prevention greatly from implementation using general-purpose CPUs. Yet the performance of such CPUs is necessary to process today's high-rate traffic streams. A key observation, however, is that much a high-volume stream can, after some initial analysis, be qualified as "likely uninteresting." To this developed an in-line, ...

Keywords: FPGA, NIC, hardware acceleration, intrusion detection

14 Information agents for automated browsing

Chanda Dharap, Martin Freeman

November 1996 **Proceedings of the fifth international conference on Information and knowledge CIKM '96**

Publisher: ACM Press

Full text available: [pdf\(1.12 MB\)](#)

Additional Information: [full citation](#), [references](#), [index terms](#)

15 Hypothesizing and reasoning about attacks missed by intrusion detection systems

Peng Ning, Dingbang Xu

November 2004 **ACM Transactions on Information and System Security (TISSEC)**, Volume 7 Issue 4

Publisher: ACM Press

Full text available: [pdf\(733.56 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Several alert correlation methods have been proposed over the past several years to construct rules from low-level intrusion alerts reported by intrusion detection systems (IDSs). However, all of them heavily on the underlying IDSs, and cannot deal with attacks missed by IDSs. In order to improve intrusion alert correlation and reduce the impact of missed attacks, this paper presents a series of hypotheses and reasons about a ...

Keywords: Intrusion alert correlation, intrusion detection, missed attacks

16 Similarity search: Efficient peer-to-peer semantic overlay networks based on statistical language

Alessandro Linari, Gerhard Weikum

November 2006 **Proceedings of the international workshop on Information retrieval in peer-to-peer P2PIR '06**

Publisher: ACM Press

Full text available: [pdf\(594.21 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

In this paper we address the query routing problem in peer-to-peer (P2P) information retrieval. We propose the idea of a Semantic Overlay Network (SON), in which each peer becomes neighbor of a small number among those that are most similar to it. Peers in the network are represented by a statistical language model from their local data collections but, instead of using the non-metric Kullback-Leibler divergence

between them, we use ...

Keywords: language models, metric space, nearest neighbor search, peer-to-peer, semantic ov

17 Queueing Network-Model Human Processor (QN-MHP): A computational architecture for r
human-machine systems

Yili Liu, Robert Feyen, Omer Tsimhoni

March 2006 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 13 Issue 1

Publisher: ACM Press

Full text available: [pdf\(1.25 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index term](#)

Queueing Network-Model Human Processor (QN-MHP) is a computational architecture that integ approaches to cognitive modeling: the queueing network approach and the symbolic approach (i MHP/GOMS family of models, ACT-R, EPIC, and SOAR). Queueing networks are particularly suite activities and complex structures. Symbolic models have particular strength in generating a pers task situations. By integrating the two ...

Keywords: Cognitive model, cognition, human information processing, human-computer intera

18 The design and implementation of hierarchical software systems with reusable component

Don Batory, Sean O'Malley

October 1992 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volum

Publisher: ACM Press

Full text available: [pdf\(3.15 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [inc](#)

We present a domain-independent model of hierarchical software system design and constructio interchangeable software components and large-scale reuse. The model unifies the conceptualiz projects, Genesis and Avoca, that are successful examples of software component/building-block modeling. Building-block technologies exploit large-scale reuse, rely on open architecture softwa granularity of programming to ...

46 Data clustering: a review

A. K. Jain, M. N. Murty, P. J. Flynn

September 1999 **ACM Computing Surveys (CSUR)**, Volume 31 Issue 3

Publisher: ACM Press

Full text available: pdf(636.24 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Clustering is the unsupervised classification of patterns (observations, data items, or feature vectors) into clusters. The clustering problem has been addressed in many contexts and by researchers in many fields, reflecting its broad appeal and usefulness as one of the steps in exploratory data analysis. However, the problem is computationally intractable in general, and differences in assumptions and contexts in different communities have led to a variety of useful generic clustering algorithms ...

Keywords: cluster analysis, clustering applications, exploratory data analysis, incremental clustering, unsupervised learning

47 On randomization in sequential and distributed algorithms

Rajiv Gupta, Scott A. Smolka, Shaji Bhaskar

March 1994 **ACM Computing Surveys (CSUR)**, Volume 26 Issue 1

Publisher: ACM Press

Full text available: pdf(8.01 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Probabilistic, or randomized, algorithms are fast becoming as commonplace as conventional deterministic algorithms. This survey presents five techniques that have been widely used in the design of randomized algorithms, and illustrates using 12 randomized algorithms—both sequential and distributed—that span a wide range of applications, including primality testing (a classical problem in number theory), interactive probabilistic proof

Keywords: Byzantine agreement, CSP, analysis of algorithms, computational complexity, dining distributed algorithms, graph isomorphism, hashing, interactive probabilistic proof systems, leac routing, nearest-neighbors problem, perfect hashing, primality testing, probabilistic techniques, probabilistic algorithms, randomized quicksort, sequential algorithms, transitive tournaments, ur
